From: Ben Kyger
 Director
 NCEP Central Operations

Subject: Updates to Marine Channel Forecast Data on TGFTP:
 Effective April 12, 2022

Effective on or about April 12, 2022 at approximately 1700 Coordinated Universal Time (UTC), the National Centers for Environmental Prediction (NCEP) Central Operations (NCO) will move the Tampa Bay Marine Channel Forecast (MCF) data to a new location on the NWS Web Services TGFTP site.

Data is already populating in the new location, so users can switch to the new location at any time.

NCO will also be adding MCF data from Mobile Bay alongside the Tampa Bay output. Please see this SCN for more information on the Mobile Bay data: https://www.weather.gov/media/notification/pdf2/scn21-99_mobile_marine_channel_forecast.pdf

In the future, other MCF data may be added as well, after an opportunity for public input.

Current Location of Tampa Bay MCF Data Slated for Removal:
