

**Incident Management Situation Report  
Friday, March 17, 2023 – 0730 MDT  
National Preparedness Level 1**

**National Fire Activity (March 10, 2023 – March 16, 2023):**

<b>Fire Activity and Teams Assigned</b>	<b>Total</b>
Initial attack activity:	Light (527 fires)
New large incidents:	10
Large fires contained:	6
Uncontained large fires: **	7
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
<a href="#">Complex IMTs</a> committed:	0

Nationally, there is 1 fire being managed under a strategy other than full suppression.

\*\*Uncontained large fires only include fires being managed under a full suppression strategy.

## Southern Area (PL 1)

<b>Fire Activity and Teams Assigned</b>	<b>Total</b>
New fires:	320
New large incidents:	9
Uncontained large fires:	7

\* **Raccoon**, Big Cypress National Preserve, NPS. Thirty miles east of Naples, FL. Southern rough. Minimal fire behavior with smoldering.

\* **Young**, Osage Agency, BIA. Three miles west of Okesa, OK. Tall grass and hardwood litter. Extreme fire behavior with running, torching and spotting.

\* **Range**, North Carolina Forest Service. Six miles northwest of Ellerbe, NC. Hardwood litter. Extreme fire behavior with crowning.

\* **Dry Creek**, Oklahoma DOF. Two miles east of Marble City, OK. Timber. Moderate fire behavior with running. Structures threatened.

\* **Scorpion**, Osage Agency, BIA. Thirty-six miles north of Barnsdall, OK. Hardwood litter. Active fire behavior with running, spotting and torching.

**Gooskie**, Florida Forest Service. Ten miles northeast of Ocala, FL. Grass and southern rough. Minimal fire behavior with smoldering and creeping.

\* **Daytona Rd**, Florida Forest Service. Three miles northeast of Deland, FL. Timber. Moderate fire behavior with short-range spotting.

## **Predictive Services Discussion:**

Thunderstorms will develop across portions of the Southeast today and much of Florida to the southeast Atlantic Coast tomorrow. Relatively dry and occasionally breezy conditions are likely across much of the Southeast this weekend through early next week, but chances of rain and thunderstorms may continue in portions of Florida to the southeast Atlantic and Gulf Coasts. Periodic dry and breezy conditions are likely on portions of the southern and central High Plains into next week, with thunderstorms possibly returning mid to late next week on portions of the southern Plains into the Mississippi Valley and Southeast.

Precipitation returns to parts of Pacific Northwest and California this weekend, with another atmospheric river making landfall on the West Coast, primarily focused on California, early next week. Widespread precipitation is expected on the West Coast, with the heaviest precipitation in the Sierra and the Coast Ranges of California. Precipitation will spread across the Intermountain West through mid-next week, including areas of heavy precipitation in the central and southern Rockies and Great Basin. Heavy snow is expected in the mountains, with rain likely up to mid-elevations before lowering. More flooding is expected across the West next week.
