Undergraduate NanoCert® in U.S. Government Security Fundamentals

The University's Security Management NanoCert® programs provide a broad understanding of major security threats affecting government, public, and private organizations and entities.

This NanoCert may be of interest to those who wish to pursue a future undergraduate degree.

The University's Security Management NanoCerts provide government and security professionals and those in the military with an opportunity to advance their knowledge of measures to protect public and private safety.

NOTE: Completion of this program does not award any professional certifications but can be applied toward undergraduate coursework ultimately leading to a bachelor's degree.

NanoCert Objectives

After successfully completing this NanoCert, the student will be able to:

- Identify requirements for managing security in a wide range of U.S. government-sponsored facilities.
- Interpret the importance of Critical Infrastructure Protection to the national security of the United States.
- Examine the personnel security clearance process as it relates to access to classified information.
