

Garden Highway Road Closure Update

What:

Our current road closure of Garden Highway between Interstate 5 and Gateway Oaks Dr will be extended until June 27, 2020 to complete necessary roadway reconstruction work. This will continue to be a 24 hour, 7 days a week full closure of the roadway.

Why:

Originally scheduled to occur later this summer, we re-sequenced our work in an effort to expedite the project while many people aren't travelling as much due to statewide "stay-at-home" directives. While installation of the seepage cutoff wall has been progressing well, it was decided to complete roadway restoration work in this segment now to avoid having to close the roadway again later this summer. Detours and signage directing people to open businesses west of Gateway Oaks Dr are in place.

When:

Closure now estimated to continue until June 27, 2020.

What are the detours to get around this work?

Detour signage is posted along surface streets beginning at the Interstate 5 Garden Highway off-ramp. Drivers trying to access locations west of Interstate 5 are advised to exit at West El Camino Ave, travel west, turn left onto Gateway Oaks Dr, and then turn right onto Garden Highway. Drivers trying to reach Interstate 5 from locations west of I-5 will be detoured onto Gateway Oaks Dr, turn right onto West El Camino Ave and then enter I-5 South. Drivers trying to go north are advised to follow the same detour, exiting onto Garden Highway and then re-entering the northbound lanes. The attached map shows the detours to get around this closed section of Garden Highway.
