FISCAL YEAR 2018 Civil Works Budget of the U.S. Army Corps of Engineers

May 2017

DEPARTMENT OF THE ARMY
OFFICE OF THE ASSISTANT SECRETARY FOR CIVIL WORKS
WASHINGTON, D.C. 20310-0108

OVERVIEW OF FISCAL YEAR 2018 CIVIL WORKS BUDGET

The President's Budget for Fiscal Year (FY) 2018 for the Civil Works program of the Army Corps of Engineers funds the development, restoration, and protection of the Nation's water, wetlands, and related resources, through studies, construction, and operation and maintenance of projects, the Corps regulatory program, the cleanup of certain sites contaminated as a result of the Nation's early atomic weapons development program, and emergency response preparedness. The Budget focuses on the highest performing work within the three main water resources missions of the Corps: commercial navigation, flood and storm damage reduction, and aquatic ecosystem restoration.

The Budget provides \$5.002 billion in discretionary funding for the Civil Works program, including approximately \$2.098 billion to support commercial navigation; \$1.37 billion for flood and storm damage reduction; and \$335 million for aquatic ecosystem restoration. Of these amounts, \$965 million would be derived from the Harbor Maintenance Trust Fund and \$26 million would be derived from the Inland Waterways Trust Fund. The Budget includes \$265 million for seven dam safety, seepage control, and static instability correction projects and \$21 million for interim risk reduction measures at Corps dams. The Budget gives priority to maintaining the key features of the infrastructure that the Corps owns and operates, and to the maintenance of coastal ports. The Budget also proposes to divest the Washington Aqueduct, which is the wholesale water supply system for Washington, D.C.; Arlington County, Virginia; the City of Falls Church, Virginia; and parts of Fairfax County, Virginia and is the only local water supply system in the Nation owned and operated by the Corps.

Operation and Maintenance. The Budget provides \$3.1 billion for the Operation and Maintenance account, and uses the criteria on page 53 to guide allocation of those funds. Funding allocations for the maintenance of commercial navigation, flood and storm damage reduction, and hydropower projects is informed by assessments of risk, based on project condition and consequence of a failure.

Construction. The Budget provides \$1.02 billion for the Construction account and uses the criteria included on page 52 as well as project schedules to guide allocation of funds. The Budget for the construction program funds projects with the highest economic, environmental and safety returns to the Nation and focuses on completing ongoing projects, instead of starting additional projects. The Budget funds capital investments in the inland waterways within the limits of estimated revenues to the Inland Waterways Trust Fund under current law, and proposes a new user fee to increase revenue to this trust fund to help finance future capital investments.

Investigations. The Budget provides \$86 million for the Investigations account. The Budget focuses on funding ongoing feasibility studies to completion and promoting efforts to provide local communities with technical and planning assistance to enable them to reduce their flood risk.

Mississippi River and Tributaries. The Budget includes \$253 million for ongoing construction, operation and maintenance, and investigation activities, with emphasis on the 1,600 miles of levees and related features on the main stem of the lower Mississippi River and in the Atchafalaya Basin, which reduce the flood risk to a large region.

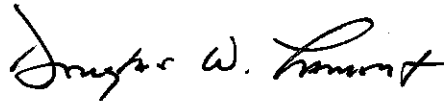

Flood Control and Coastal Emergencies. The Budget provides \$35 million for preparedness for floods, hurricanes, and other natural disasters, bringing together State and Federal agencies to reduce flood impacts.

Regulatory. The Budget provides \$200 million for the Regulatory program to protect the Nation's waters and wetlands and provide efficiency in permit processing.

Formerly Utilized Sites Remedial Action Program (FUSRAP). The Budget provides \$118 million to clean up specific sites contaminated as a result of the Nation's early atomic weapons development program.

Expenses. The Budget provides \$185 million for the Expenses account, which funds the civil works responsibilities of the Corps headquarters and division offices, and other operational costs.

Office of the Assistant Secretary of the Army (Civil Works). The Budget provides \$5 million for the Office of the Assistant Secretary of the Army for Civil Works, whose responsibilities include policy direction and oversight of the Civil Works program.

A handwritten signature in black ink, appearing to read "Douglas W. Lamont". The signature is fluid and cursive, with the first name being the most prominent.

Douglas W. Lamont, P. E.
Senior Official Performing the Duties of the
Assistant Secretary of the Army
(Civil Works)

**DEPARTMENT OF THE ARMY CORPS OF ENGINEERS
CIVIL WORKS FISCAL YEAR 2018 BUDGET**

The Fiscal Year (FY) 2018 Budget provides \$5,002,000,000 for the Civil Works program of the U.S. Army Corps of Engineers. The Civil Works program supports water resources development, management, and restoration through investigations and surveys, engineering and design, construction, and operation and maintenance as authorized by Congress. FY 2018 requested appropriations and current estimates of additional new resources are as follows:

Appropriations Accounts:	Amount (\$)
Investigations	86,000,000
Construction	1,020,000,000 1/
Operation and Maintenance	3,100,000,000 2/
Regulatory Program	200,000,000
Flood Control, Mississippi River and Tributaries	253,000,000 3/
Expenses	185,000,000
Flood Control and Coastal Emergencies	35,000,000
Formerly Utilized Sites Remedial Action Program	118,000,000
Assistant Secretary of the Army, Civil Works	5,000,000
TOTAL	5,002,000,000
Sources of Appropriations:	
General Fund	(3,965,750,000)
Harbor Maintenance Trust Fund	(965,000,000)
Inland Waterways Trust Fund	(26,250,000)
Special Recreation User Fees	(45,000,000)
TOTAL	(5,002,000,000)
Additional New Resources Not Included in the Budget:	
Rivers and Harbors Contributed Funds	481,000,000 4/
Coastal Wetlands Restoration Trust Fund	78,000,000 5/
Permanent Appropriations	20,000,000 6/
Special Use Permit Fees	1,000,000
Interagency America the Beautiful Pass Revenues	1,000,000
Bonneville Power Administration	256,000,000
South Dakota Terrestrial Trust Fund	3,000,000
TOTAL	840,000,000

1/ Includes \$26,250,000 from the Inland Waterways Trust Fund and \$36,750,000 from the Harbor Maintenance Trust Fund.

2/ Includes \$923,376,000 from the Harbor Maintenance Trust Fund and \$45,000,000 in Special Recreation User Fees.

3/ Includes \$4,874,000 from the Harbor Maintenance Trust Fund.

4/ Includes amounts for the required non-Federal cost share of projects; amounts in excess of the non-Federal cost share that are provided as voluntarily contributed or advanced funds; and amounts for certain work carried out in connection with the project with 100 percent non-Federal funding

5/ Transferred from the Sport Fish Restoration Account of the Aquatic Resource Trust Fund for planning, protection, and restoration of coastal wetlands in the state of Louisiana.

6/ Includes Payment to States, Maintenance and Operation of Dams, and Hydraulic Mining

MVD	UPPER MISSISSIPPI RIVER RESTORATION, IL, IA, MN, MO & WI

** Legal, Mitigation and/or Environmental Requirements

FY 2018 Construction Performance Guidelines

To qualify, a project must be authorized for construction; have an approved Chief's report, major rehabilitation report, or Dam Safety modification report; and, where applicable, successfully completed review under Executive Order 12322.

- **Project Purpose** – Ongoing construction projects, including those funded in the Mississippi River and Tributaries account, are assigned based on their primary purpose to one of the three main mission areas of the Corps (flood and storm damage reduction, commercial navigation, and aquatic ecosystem restoration) or hydropower.
- **Projects funded to address dam safety assurance, seepage control, and static instability correction problems** – Projects that are funded for construction to address a dam safety action classification 1 or 2 concern will receive the maximum level of funding that the Corps can efficiently and effectively spend each year.
- **Projects funded on the basis of their economic return** – Ongoing construction projects that are funded based on their economic return and have a benefit-to-cost ratio (BCR) of 2.5-to-1 or higher, calculated at a 7-percent discount rate, are eligible for funding. Projects with a BCR below this threshold will not be funded unless they are eligible for funding under other criteria of these guidelines.
- **Projects funded on the basis of their environmental return** – Ongoing construction projects to restore degraded ecosystem structure, function, and/or process to a more natural condition are eligible for funding.
- **Projects funded to address a significant risk to human safety** – Flood and storm damage reduction projects that are funded to address a significant risk to human safety will receive funding to support an uninterrupted effort.
- **Mitigation or environmental requirements** – Mitigation work at ongoing construction projects, and work needed to comply with treaties or biological opinions, will be funded to meet those requirements.
- **Non-structural flood damage reduction projects** – Ongoing non-structural flood damage reduction projects will be eligible for funding if the project has a BCR of 1.0-to-1 or above, at a 7-percent discount rate.
- **Dredged Material Disposal Facilities (DMDF)** – Construction of DMDFs for high and moderate use segments of commercial deep-draft, shallow-draft, and inland waterways projects will be eligible for funding.
- **Project completions** – Ongoing projects that can complete all remaining construction work during the budget year may be funded at the level needed to complete that work if the project has a BCR of 1.0-to-1 or above, at a 7-percent discount rate.

FY 2018 Operation and Maintenance Performance Guidelines

The Corps uses objective performance-based criteria to allocate operation and maintenance (O&M) funds to Corps projects. These criteria give priority to key infrastructure and consider the condition of the project and the potential consequences (e.g., economic, legal, environmental, and public safety impacts) if the O&M activity is not undertaken in the fiscal year. The criteria, with an explanation of how the Corps applies them, are provided below:

Each proposed O&M activity, including O&M activities funded in the Mississippi River and Tributaries account, is assigned to these program areas: commercial navigation, flood and storm damage reduction, environment, recreation, hydropower, and water supply. For projects with multiple purposes, the separable activities are assigned to the program area that they serve. Joint activities (those shared by all business lines) are allocated among all program areas served by the project based upon a project-specific allocation formula.

- **Asset Management** – Rating criteria are used to determine the impact (e.g. financial, health and safety) of reduced availability. The results of condition (e.g., hydroAMP for the hydropower business line) and consequence evaluations lead to a risk level based on an established matrix for each program area. Cost-effectiveness measures are used to determine the lowest-cost solution to improve the overall reliability of the project. These specific performance measures incorporate both economic and public safety concerns, as well as residual risks, in project reliability determinations.
- **Economic Impacts** – O&M funding decisions are made using performance data to forecast the economic impact of the activity. Activities with higher returns on investment receive higher priority in the budget process. For example, the evaluation for commercial navigation includes the current and five-year average tonnage (coastal) and ton-miles (inland waterways), cost per ton and cost per segment ton-miles, as well as other factors such as support for subsistence harbors, harbors of refuge, commercial fishing, public transportation (passenger ferries), or for energy generation. For flood and storm damage reduction, it includes the risk of loss of life or property; for recreation, it includes the economic impacts of visitor attendance; for water supply, it includes the economic impacts of storage under contract, investment costs recovered, and revenues returned to the U.S. Treasury; and for hydropower, it includes the risk of equipment failure and loss of generation.
- **Public Safety** – Public safety is also a factor used in ranking O&M activities. A proposed work package is given greater consideration if its purpose is to reduce the risk of a project failure that could result in loss of life. For commercial navigation, other factors include whether the harbor is a critical harbor of refuge, supports a subsistence harbor, or supports other Federal requirements such as the U.S. Coast Guard search and rescue.
- **Environment and Stewardship Concerns** – O&M to address a significant environmental concern is evaluated on its environmental return (benefits-per-funding amount). Those O&M activities that are time-sensitive, involve management for sensitive species or habitat impacts, management of cultural resources, or reduce the relative risk of significant impacts, are given a higher consideration for funding.
- **Legal Requirements** – Projects with O&M-related legal requirements are also given a higher consideration for funding (e.g., projects with requirements to address Indian tribal rights or whose operation involves ongoing mitigation needs). Projects with authorized O&M work to mitigate the impact of Corps activities are funded in increments beginning with the minimum critical mitigation requirements followed by critical work packages based on the risks related to the potential loss of a species under the Endangered Species Act. Endangered Species Act and mitigation activities are budgeted under the business line for which the requirements were created.
