DEPARTMENT OF THE ARMY  
OFFICE OF THE ASSISTANT SECRETARY FOR CIVIL WORKS  
WASHINGTON, D.C. 20310-0108

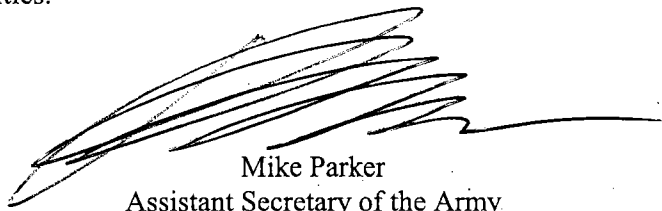

PREFACE

This document presents the President's Fiscal Year (FY) 2003 budget for the Civil Works program of the Army Corps of Engineers. The budget proposes funding to continue development and restoration of the Nation's water and related resources, operation and maintenance of existing navigation, flood damage reduction, and multiple-purpose projects, protection of the Nation's waters and wetlands, and restoration of sites contaminated as a result of the Nation's early atomic weapons development program. In allocating funds available for Civil Works, the budget gives priority to projects and programs that provide significant national benefits in the Corps' principal mission areas of commercial navigation, flood damage reduction, and environmental restoration.

The budget includes new appropriations of \$4.290 billion, consisting of \$3.258 billion from the general fund, \$764 million from the Harbor Maintenance Trust Fund, \$85 million from the Inland Waterways Trust Fund, \$34 million from Special Recreation User Fees, and, under proposed legislation, \$149 million from direct financing of hydropower operation and maintenance costs by three Federal power marketing administrations. Other program funding is estimated at \$464 million, including \$118 million transferred from the Bonneville Power Administration for operation and maintenance of hydropower facilities in the Pacific Northwest and \$272 million contributed by non-Federal interests.

In recent years, new construction starts have been numerous and exceeded what could be funded efficiently, which has resulted in delays in completing those projects already under construction. The balance of funding needed to complete the budgeted projects currently in the Construction, General (CG) program has grown to an estimated \$21 billion in FY 2002. To address this problem, the budget directs CG funding to ongoing projects, especially those that are nearing completion, redirects funding from the planning and design of new projects and from projects added by Congress in FY 2002 that are inconsistent with long-established policies, and includes no funds for discretionary new construction starts. In FY 2003, 30 CG projects, or 15 percent, are budgeted to be completed. The budget includes substantial CG funding increases to accelerate construction of: the New York and New Jersey Harbor deepening project, a \$31.5 million increase to \$120 million; Olmsted Locks and Dam project in Illinois and Kentucky, a \$37 million increase to \$77 million; and restoration of the Florida Everglades, an increase of \$10 million to \$149 million. The budget also ensures that environmental requirements for the Columbia River Basin and for the acquisition and development of shallow water habitat on the Missouri River will be met.

The budget provides increased funding for the Regulatory Program to reduce the average review time of individual permit applications by about 25 percent by FY 2004, while strengthening protection of regulated waters and wetlands. In the operation and maintenance program, the budget gives priority among ports and harbors to those that are used for commercial activities or subsistence fishing. The budget gives priority among waterway segments to those that provide higher commercial navigation savings per dollar, including segments with high cargo volumes or low costs per ton-mile of cargo. In the Mississippi River and Tributaries program, the budget gives priority to flood damage reduction projects on the main stem of the Mississippi River and in the Atchafalaya River basin, Louisiana. The budget also continues phased increases in recreation user fees, with the added fee receipts being available to the Corps to spend on operation, maintenance, and improvement of its recreation facilities.

Assistant Secretary of the Army  
(Civil Works)

DEPARTMENT OF THE ARMY  
 CORPS OF ENGINEERS – CIVIL WORKS  
 FISCAL YEAR 2003 BUDGET REQUEST

The Fiscal Year 2003 Budget provides \$4,290,000,000 for the Civil Works program of the Army Corps of Engineers. The Civil Works program provides for nationwide water resources development and management through investigations and surveys, preconstruction engineering and design, construction, and operation and maintenance for the purposes of flood and storm damage reduction, navigation, environmental restoration, and hydropower generation, as authorized by Congress. Funding for the Civil Works program includes \$463,966,000 in additional resources, including \$272,464,000 in non-Federal contributions. Requested FY 2003 appropriations and additional new resources are as follows:
