

Dear Colleague,

You are cordially invited to the Worldwide ADNI (WW-ADNI) Update Meeting **on Friday, July 12<sup>th</sup>, 2013**. The WW-ADNI meeting will be a full day event. This meeting will provide an overview of North American ADNI throughout the morning session and international efforts in the afternoon session.

During this meeting, researchers around the globe, including the United States, Canada, Japan, Australia and diverse European countries, as well as Argentina, China, Korea, and Taiwan, come together to update one another on the international efforts under WW-ADNI to identify biomarkers that will measure Alzheimer's disease progression. These collaborative efforts help cut across scientific barriers such as longitudinal observations, standardization, replication of results, and independent validation of results to advance progress. The importance of supporting worldwide efforts through significant investment of resources is readily apparent within the field of Alzheimer's disease research.

This meeting is sponsored by the Alzheimer's Association.

**Date:** Friday, July 12, 2013

**Time:** 8:00-8:30a.m. Breakfast  
8:30.m.-12:20p.m.- ADNI Update Meeting
