

COVID-19 Mortality Vaccination Report

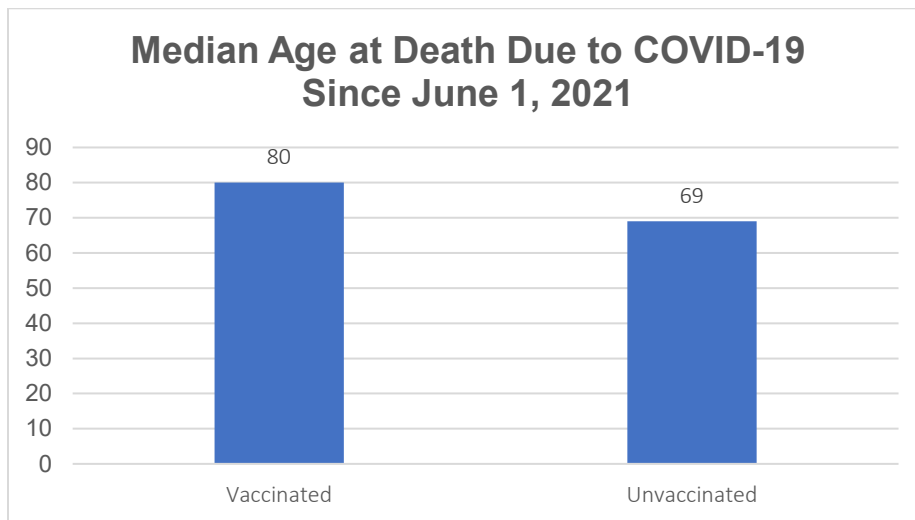

The following data are based on county vaccination status as of 12/30/2021 and based on 225 deaths since 6/1/2021 where vaccination status was known.

Vaccinated is defined as those with one or more COVID-19 vaccine doses.

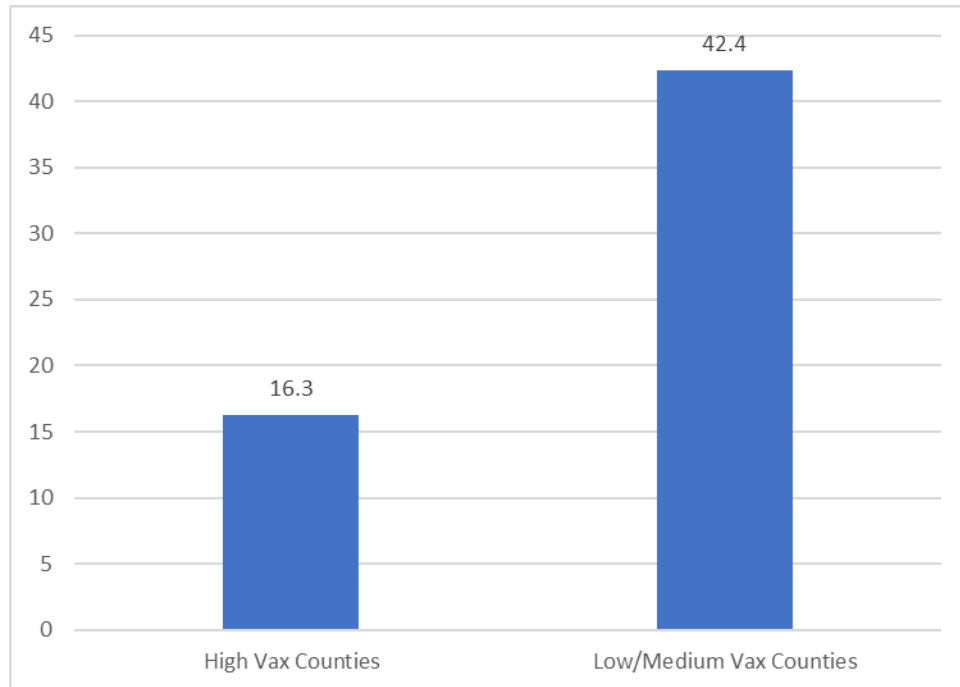

South Dakota Resident Death Rates by Age Due to COVID-19 by Vaccination Status Since June 1, 2021

Deaths rates are per 100,000 population.

South Dakota Resident Death Rates Due to COVID-19 Based on County of Residence for the Vaccinated Population Only Since June 1, 2021

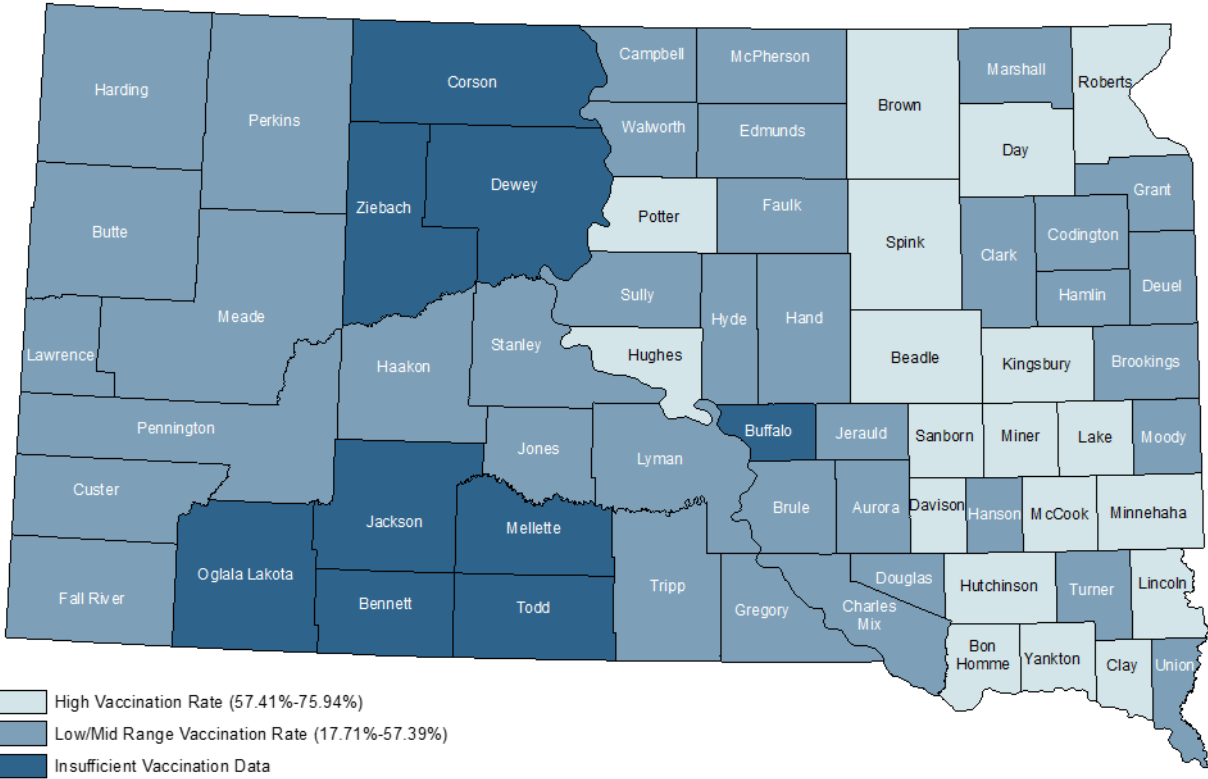

High Vax Counties - The top one-third of the counties, which are the 19 counties with the highest vaccination rates as of December 30, 2021.

Low/Medium Vax Counties - The bottom two-thirds of the counties, which are the 38 counties with the lowest vaccination rates as of December 30, 2021.

Note: *There is insufficient vaccination data for 9 Counties

South Dakota Counties by COVID-19 Vaccination Status as of 12/30/2021

Note: Vaccination rates are for ages 5 and older. Counties noted as having insufficient vaccination data have a large portion of COVID-19 vaccination provided by Indian Health Service and Tribal Clinics, which are included in statewide coverage, but not at the county level.
