

# kaspersky

## On-site Implementation Service

Receive in-person expert guidance on your Kaspersky installation and configuration.

Invest in proper implementation:

- ✓ Master best practices
- ✓ Optimize app configurations
- ✓ Minimize future disruptions
- ✓ Enhance security posture

Benefit the on-site work of a Kaspersky-certified professional:

**Feature-and-function overview** for all Kaspersky software

**Software removal strategy** for current security, including execution of uninstall tasks

**Walkthrough deployment** for a representative subset of your environment

**Proven methodologies and best practices** derived from thousands of implementations

**Effective knowledge transfer and enablement**, providing staff with skills to deal with future security issues

**Accelerated time to value** with shortened learning curve and reduced fault-finding and remediation costs

**Reduced implementation risks** including security and system down time

**Optimized security investment** with products implemented and configured for top performance

Apply your service to products and features like these:

- Security Center
- Endpoint Security
- Endpoint Security Cloud
- Security for File Servers
- Security for Mail Servers
- Security for Virtualization
- Anti Targeted Attack Platform
- Ransomware/Crypto Protection and Rollback
- Patch Management
- Application, Web and Device Control
- Vulnerability Scanning
- Encryption
- Application Whitelisting
- Connection Gateway
