

Interest/Capabilities Submission Form

Transmission and Distribution (T&D) Repairs Services

Puerto Rico Power System Stabilization

FIRM NAME:

Anticipated Scope of Services under the proposed Indefinite-Delivery Contract (IDC)

Contracts for the Transmission and Distribution (T&D) include the procurement and installation of transformers, breakers, switches, relays, control cables, and duct banks for underground routing of cabling associated with the operation of equipment listed. The procurement and installation provide redundancy and resiliency to stabilize the T&D of the Puerto Power System and allows movement of energy throughout the system, including moving energy from the south side of Puerto Rico to the more populous northeastern region.

Based on the above anticipated scope and your firm's capabilities, would you be interested in submitting a proposal under a small business set-aside solicitation for such services?

Yes

No

If yes, indicate whether you'd be interested in proposing as a prime contractor a subcontractor or both.

Prime Contractor

Subcontractor

Both

Please describe the specific capabilities your firm offers which would enable you to perform this type of work. In doing so, please map your capabilities to the scope described above, rather than merely describing generic capabilities.

In procuring such services, are there any constraints or potential issues the Government should consider when planning and structuring the proposed contract? Such constraints or issues may be related to pricing, delivery/schedule/lead time, or anything related to overall performance.
