

# POV Port Locations

Go to [www.pcsmypov.com](http://www.pcsmypov.com)

Click on “Locations” at the top.

Using the map, select the “Pin” for the City/State you will be using.

For individuals assigned in Phoenix, San Diego is the “Authorized Port”. Due to proximity, Los Angeles is also an Authorized Port.

You can elect to use a different port, but it must be “In the Direction Of”

Example: You are stationed at Luke. You are PCS’ing to Germany. You are “Authorized” either Los Angeles or San Diego. You want to ship your POV from Dallas instead. That is OK! Dallas is “In the Direction Of”. You can still use a Location other than Authorized or In the Direction Of, but you will pay the difference from San Diego (Authorized Port)

Example: You are PCS’ing to Alaska. Your Authorized Ports would be San Diego, Los Angeles, or Seattle (In the Direction Of). You want to ship out of Dallas. You can, but will have to pay the contractor the difference between Dallas and San Diego.
