Notice No. below

US Army Corps of Engineers, Pittsburgh District
1000 Liberty Avenue
Pittsburgh, PA 15222-4186

Application No. 2010-335

Date: March 9, 2022

Notice No. 22-18

Closing Date: April 9, 2022

1. **TO ALL WHOM IT MAY CONCERN:** The following application has been submitted for a Department of the Army Permit under the provisions of Section 404 of the Clean Water Act.
2. **APPLICANT:** Department of General Services
Bureau of Engineering and Architecture
18th and Herr Streets
Harrisburg, PA 17125
3. **LOCATION:** Unnamed Tributary to Turtle Creek (locally known as Dirty Camp Run), Allegheny County, Pennsylvania (40.420000, -79.775833)
4. **PURPOSE AND DESCRIPTION OF WORK:** The applicant requests the reauthorization of a previously issued permit to construct a flood protection project along an unnamed tributary to Turtle Creek (Dirty Camp Run) that frequently damages structures within the Borough of Pitcairn. The flood control project will be designed to manage the 100-year flood event. The unnamed tributary is locally known as Dirty Camp Run and drains an approximately 3 square mile watershed area. Dirty Camp Run and its associated tributaries currently have a Chapter 93 designated use as a Warm Water Fishery (WWF). In addition, Dirty Camp Run is a Clean Water Act 303 (d) listed stream with aquatic life that is impaired as a result of bank modifications and siltation.
Development of the Dirty Camp Run flood control project will impact approximately 7,000 feet of stream channel, which is approximately 2.59 acres of Waters of the United States below the Ordinary High Water Mark. There are no proposed wetland impacts associated with this project. The following is proposed beginning at Sugar Camp Park and continuing downstream to the mouth of Dirty Camp Run, entering Turtle Creek: The construction of a 230 foot long X 170 foot wide earthen debris basin in Sugar Camp Park, 400 feet of rock riprap-lined trapezoidal channel, 120 feet of 20 foot wide cast in place concrete 'U' channel, 85 feet of 18 feet wide to 20 feet wide cast in place concrete 'U' channel, 3920 feet of 18 foot wide cast in place concrete 'U' channel, 1980 feet of 18 foot wide precast concrete box culverts under Wall Avenue and Taylor Avenue. The unnamed tributary to Turtle Creek (Dirty Camp Run) flows to Turtle Creek, which flows to the Monongahela River.

Stream impacts will be mitigated by constructing the proposed catch basin in Sugar Camp Park and reducing downstream sediment load. Drawings of the proposed project are attached.

5. ENCROACHMENT PERMIT: A Water Obstruction and Encroachment Permit including 401 Water Quality Certification was issued on November 27, 2017 from

*Pennsylvania Department of Environmental Protection
Bureau of Waterways Engineering and Wetlands
Rachel Carson State Office Building
P.O. Box 8460
Harrisburg, PA 17105-8460*

Phone: 717-783-1754

6. IMPACT ON NATURAL RESOURCES: The District Engineer has consulted the most recently available information and has determined that the project will have no effect on endangered species or threatened species, or result in destruction or adverse modification of habitat of such species which has been determined to be critical. While concurrence with this determination is not required, this Public Notice serves as a request to the U.S. Fish and Wildlife Service for any additional information they may have on whether any listed or proposed to be listed endangered or threatened species may be present in the area which would be affected by the activity, pursuant to Section 7(c) of the Endangered Species Act of 1972 (as amended).

7. IMPACT ON CULTURAL RESOURCES: The National Register of Historic Places has been consulted, and it has been determined that there are no properties currently listed on the register which would be directly affected by the proposed work. If we are made aware, as a result of comments received in response to this notice, or by other means, of specific archeological, scientific, prehistorical, or historical sites or structures which might be affected by the proposed work, the District Engineer will immediately take the appropriate action necessary pursuant to the National Historic Preservation Act of 1966 - Public Law 89-665 as amended (including Public Law 96-515).

8. PUBLIC INVOLVEMENT: Any person may request, in writing, within the comment period specified in the paragraph below entitled "RESPONSES," that a public hearing be held to consider this application. The requests for public hearing shall state, with particularity, the reasons for holding a public hearing.

9. EVALUATION: Interested parties are invited to state any objections they may have to the proposed work. The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity

on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposals must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the overall public interest of the proposed activity. The evaluation of the impact of the activity on the public interest will include application of the guidelines promulgated by the Administrator, Environmental Protection Agency, under the authority of Section 404(b) of the Clean Water Act (40 CFR Part 230).

10. **RESPONSES:** A permit will be granted unless its issuance is found to be contrary to the public interest. Written statements concerning the proposed activity should be received in this office on or before the closing date of this Public Notice in order to become a part of the record and to be considered in the final determination. Any objections which are received during this period may be forwarded to the applicant for possible resolution before the determination is made whether to issue or deny the requested DA Permit. Public comments may be subject to release under the Freedom of Information Act (FOIA). All responses to this notice should be directed to the Regulatory Division, attn. Alyssa Barkley, at the above address, by telephoning (412) 395-7209, or by e-mail at Alyssa.B.Barkley@usace.army.mil. Please refer to CELRP-RG 2010-335 in all responses.

Jon T. Coleman
Chief, South Branch
