Introducing Kaspersky Value Added Services

With more and more IT security breaches being reported in the press, consumers are keen to find better ways to protect their privacy, finances and digital assets from malware and Internet-based attacks. Whether you're an Internet Service Provider, Mobile Communications Provider, Bank, Insurance Company, Financial Services Provider or Games Community – or you deliver almost any other type of online service to customers or subscribers – Kaspersky Value Added Services can help you boost your revenues by meeting your customers' demands for greater security.

Kaspersky Anti-Virus

For customers seeking essential protection that provides the backbone of security from viruses, malware, and more without slowing you down.

Kaspersky Anti-Virus is the backbone of your PC's antivirus security system, delivering essential, real-time virus protection from the latest malware. It works behind-the-scenes with intelligent scanning and small, frequent updates, while proactively protecting you from known and emerging virus threats. Enjoy essential protection that won't slow down your PC with Kaspersky Anti-Virus.

- Real-time protection against computer viruses, spyware, Trojans, rootkits, and more
- Fast and efficient PC performance
- Rapid reaction to new and emerging threats
- Instant safety checks on files, applications and websites
- Rollback of harmful malware activity

Kaspersky
Internet Security

For customers who need protection for multiple devices, including PCs, Macs, and Android smartphones and tablets, all in one easy solution.

Kaspersky Internet Security offers a single security solution to protect your PCs, Macs and Android smartphones and tablets with award-winning technologies from Kaspersky Lab.

- Easy, one-license protection of your connected PC, Mac, Android smartphone and tablet devices
- Mix-and-match security to fit any combination of devices for true multi-device security
- Customized for device protection, performance and usability
- Real-time protection against all new and emerging Internet threats
- Premium anti-theft/loss protection for your Android devices
- Helps bank, shop and pay online safely
- **FREE!** Kaspersky Safe Browser for iPhone, iPad and Windows Phone devices

Kaspersky
Total Security

For customers seeking the ultimate protection for multiple devices including online backup, password management, encryption and more.

Kaspersky Total Security is the ultimate security solution for your PCs, Macs, Android tablets and smartphones and iOS devices. It delivers everything users need to protect all their data – including their digital identity, documents, photos, music and passwords – against the latest and most sophisticated Internet threats.

- Award-winning protection against all types of malware and Internet threats
- Unique Safe Money technology helps to secure customers' financial transactions and data
- Advanced Password Manager* adds extra protection for users' digital identity
- FREE! online backup enables users to restore their data to any PC via the Internet
- Protects your privacy from webcam spying
- Enhanced protection encrypts and stores customers' most precious files
- Allows users to manage protection for multiple devices all-in-one place

*Password Manager is not available for x64 applications or browsers of all supported operating systems.

Kaspersky Internet Security for Android™

For customers who want to protect their Android tablets & smartphones from both Internet security threats and the risk of loss or theft.

- Anti-malware Protection—including Kaspersky Lab's latest Android antivirus technologies
- Web Protection—against Internet-based attacks and phishing websites
- Anti-theft Protection—with remote access to special security features on your missing device
- Privacy Protection—to control what others can see or access when they pick up your smartphone
- Call & Text Filter—so your smartphone receives only those calls and texts you want to receive

Kaspersky
iOS Security

For iPhone and iPad owners who need an extra level of protection against security and privacy threats.

Study after study is showing that iOS device owners are more concerned about data and identity theft – and with good reason, as they are at least twice as likely to be targeted by attackers as smartphone users in general. Kaspersky iOS Security is there to make sure these users' data will stay safe.

Kaspersky iOS Security provides a set of security features especially designed for iOS devices, for instance:

- Anti-Phishing – protects the users against phishing websites or emails that try to steal money or identity
- Weak settings / Jailbreak detection – alerts if the user's OS or browser settings are unsafe and suggests changes to make them more secure
- Wi-Fi security check – helps the users stay safe while shopping, banking, socializing, and transferring private data via unsecured Wi-Fi networks

Kaspersky
Safe Kids

For responsible parents who wish to protect their children in the digital world.

Kaspersky Safe Kids includes device usage scheduling, GPS safe zones, notifications about suspicious activities and summaries of what they search for, see & share. This will enable the user to always stay connected with their children and help keep them safe.

- Set up the right level of protection for each of your kids
- Guide your kids on safer use of the Web and mobile devices
- Define a Safe Area and receive alerts if your child leaves it
- Prevents digital dangers & online risks
- Lets you know where your kids are
- Helps your kids balance their digital lives
- Monitors Facebook activity

Kaspersky
Secure Connection

Protects your communications, privacy and data whenever you're online – so it's safer to surf, socialize, stream and shop.

When you want to surf the Web, Kaspersky Secure Connection automatically offers to connect you via Virtual Private Network (VPN) technology – so others can't see what you're doing and you can safely go online… in privacy.

Whether you're online banking, shopping, video streaming, socializing or dating, Kaspersky Secure Connection makes sure hackers can't read your communications. Because your location and your IP address aren't revealed, it's easier for you to access websites and content in other regions – without being traced. Kaspersky Secure Connection won't log what you're doing online and won't keep any records of which websites you visit

- Protects you on public Wi-Fi & more
- Keeps your communications private
- Lets you access more sites & content

Kaspersky Password Manager

Whether you're on PC, Mac or mobile, it's easy to protect your passwords, credit card details, confidential photos and more.

Your passwords, card details & addresses are stored in an encrypted vault… with just one Master Password for you to remember. You can even store confidential images – such as your birth certificate & passport… with Optical Character Recognition making it easy to retrieve images when you need them. you can easily access your passwords and other stored items. If you don't have your laptop, tablet or phone with you, simply go online – and you can access everything you've got stored inside Kaspersky Password Manager.

Kaspersky Password Manager is optimized for mobile… with support for both Safari and Google Chrome mobile browsers.

- Secure, encrypted storage
- Synchronization – across your devices
- Strong password generator
- Web access to your password vault
- Photos protection
- Automatic recognition of documents
- Automatic completion of forms
- Face ID and Touch ID support for iPhone and iPad and fingerprint for Android devices

Kaspersky
Small Office
Security

Kaspersky Small Office Security is a unique computer security suite designed specifically for Very Small Businesses – it is as powerful as a corporate solution while easy to install and use.

- Ideal for companies of up to 25 employees that are looking for simple yet reliable protection
- Protects Windows desktops and servers, Mac workstations, Android phones and tablets
- Money, reputation and business data are secure
- Easy to deploy, simple to administer
- Frees up time for running and growing the business

Kaspersky
Security for Microsoft
Office 365

For Microsoft 365 customers who want to keep communications flowing and free from cyberthreats. Like Microsoft Office 365 it's hosted in the cloud. And like all Kaspersky solutions it's built on the world's most tested, most awarded security.

- Increase productivity & reduce threats with next-generation spam protection
- Reduce false positives – no more disappearing mails
- Stop ransomware, phishing and other advanced threats
- Centralized management and easy-to-use policy
- Threat dashboard for insights and reports
- True type recognition – accurately recognize file type, regardless of extension
- No need for additional infrastructure
