Re: CWA 401 Water Quality Certification for the proposed RGP 63 - Repair and Protection Activities in Emergency Situations Project impacting all of Arizona
U.S. Army Corps of Engineers File No.: SPL-2018-00038-CLH

Dear Ms. Huerta:

The Arizona Department of Environmental Quality (ADEQ) has reviewed the U.S. Army Corps of Engineers (USACE) public notice dated February 9, 2018 for the reauthorization of Regional General Permit No. 63 (RGP63). Based on the public notice activities and conditions, ADEQ certifies the RGP63 with the request that the department receives notification if the proposed activity will occur within the ordinary high water mark of an Outstanding Arizona Water, an impaired or not-attaining water or a lake. Information on these waters can be found on ADEQ's website at www.azdeq.gov, keywords "305(b) Report" or using ADEQ eMaps.

Sincerely,

Trevor Baggione, Director
Water Quality Division
