

Managing flood risk is a shared responsibility.

What Can You Do?

The community and residents need to be aware of their role in managing flood risks associated with levee systems. Individual residents and businesses can take a variety of actions in order to reduce this risk.

- Be aware if you live or work behind a levee
- Remain vigilant during flood events; participate in your community's emergency notification system; listen for and follow instructions from local emergency management officials
- Know your community's flood emergency preparedness and evacuation plans and be prepared to evacuate during a flood
- Develop and practice a personal, family or business emergency preparedness plan
- Flood proof structures to reduce impacts of flooding to your home or business
- Support your local levee Sponsor in their efforts to operate and maintain a safe levee system
- Encourage elected local, county and state officials to make sound flood risk management decisions

Does your community have **CodeRED**?
