

CROSSCURRENTS

ST. PAUL DISTRICT
U.S. ARMY, CORPS OF ENGINEERS

Vol. 3, No. 8

JULY 1980

SOLAR HEATING PROJECT IN OPERATION

St. Paul District's first solar hot water system has been installed at the Upper St. Anthony Falls Lock and Dam office.

"It should save about 50% of our water heating energy use," said Roger Worth, Assistant Lockmaster.

Worth, who has had a long-standing interest in solar energy, put his ideas to work for the benefit of the Corps. He approached the Corps with his energy-saving idea of a

solar hot water system, and the Corps agreed to finance and install the system as an experimental project.

The Minnesota Energy Agency and the St. Paul District Energy Office will monitor the system for its efficiency. Depending on the findings and recommendations of the monitoring offices, other solar systems may be installed elsewhere in the District.

The system at Upper St. Anthony Falls is small; it consists of two rooftop solar collectors, an 80-gallon water storage tank, backup heater and water pump. It cost approximately \$2,500. The project was initiated in January 1980 and completed in early June 1980. Worth has directed the project since its inception.

This project will also help promote solar energy to the public. An exhibit explaining how the system functions will be displayed in the Upper St. Anthony Falls visitor center.

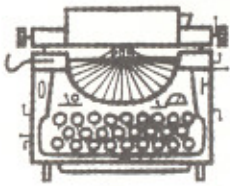

LISTENING AND WATCHING CLOSELY... were several Corps retirees who came to the District Office in mid-June for a briefing on current Corps activities and operations. Several staff members gave presentations; the slide presentation "Keeper of the Waters" was also shown.

Celebrities Board the Miss. Queen

Two well-known persons, radio newsman Paul Harvey and actress Helen Hayes went aboard the MISSISSIPPI QUEEN on July 4.

Harvey was traveling from St. Louis, MO. with his family including his son who is a concert pianist. (The Delta Queen Company placed a piano aboard for him.) Harvey accepted an invitation from the American Waterways Operators to go aboard a towboat and it was agreed that the transfer would take place at Lock and Dam #4 on July 10; he was scheduled to debark in St. Paul on July 11.

Hayes and her cousin were aboard the riverboat from St. Louis on a personal vacation.

From the Editor's Desk

Since my request last month for more mail from you, the readers, I have received quite a bit of response. I am asking you to please help the small staff of Crosscurrents by contributing information, photos, stories and articles. Let us know what is happening to you, your co-workers, and your office; our staff is especially interested in office operations and various projects.

Park Visitor Impressed With Site

A letter of appreciation was received in mid-June from Mr. & Mrs. Arthur Green of Englewood, Florida. They mentioned the following:

"We are spending our fourth summer in the Lake Winnibigoshish (Mississippi River headwaters recreation) area and just wanted you to know how much we enjoy the park. It is the nicest and best kept park of any we have stayed in.

And we cannot compliment enough the young men who work here for their very courteous manners and efficient way they handle their duties."

A Mention of Thanks

The following letter of appreciation was received after a recent visit by Col. William Badger in late May to St. Cloud University, MN. The letter was written by Glenn Stocker, Ph.D., Department of Speech Communication.

"Your conversation with my class in political communication was well-received and most interesting. We appreciated your candid comments and the complete description of your duties within your organization. Please pass on our thanks to Jim Braatz (PA), also. Best wishes for the future!"

Federal Woman's Program News

The Twin Cities chapter of Federally Employed Women (FEW) will hold a dinner meeting on Monday, July 14, 1980. Shelli Dockman, the guest speaker, will speak on "How to Win the Battle Against Inflation." The dinner will be held at Sammy D's, 1305 SE 4th Street (Dinkytown) at 5:30 p.m. The meeting will take place at the Southeast Public Library, 1222 SE 4th St. (across from Sammy D's). Reservations are required if you plan to attend the dinner. For dinner reservations, call Debbie Anderson at work (725-7135) or at home (869-5042).

Carol Kerner, Vice President for Public Relations at Hamline University, will be speaking on "A Mentor: How to Get One, How to Use One, How to Be One" for the YWCA Continental Breakfast. The breakfast will be at the St. Paul Downtown YWCA on Wednesday, July 23 at 7:30 a.m.

A few places are still available for the FWP-sponsored seminar "Preparing Written Credentials." It's being offered in the St. Paul Main Post Office Building on July 16.

Mary Schommer, ED-PB, has been selected in an Upward Mobility position as a Civil Engineering Technician, GS-5/6 with the ultimate goal of being promoted to a Civil Engineer, GS-7/9/11.

Annual Corps Reunion Scheduled

The Fifth Annual Reunion of Corps of Engineers Employees, Past and Present will be held in Roseville, MN. on Sept. 5. All past and present employees of any Corps office or field unit with their spouses and spouses of former employees are welcome.

Reservations are requested by Aug. 20, 1980. For more information, please turn to the back page.

CROSSCURRENTS is an unofficial publication authorized under the provisions of the AR 360-81, published monthly by offset press for employees of the St. Paul District. Views and opinions expressed are not necessarily those of the Department of the Army. Address mail to: CROSSCURRENTS, ATTN: Public Affairs Office, U.S. Army Corps of Engineers, St. Paul District, 1135 U.S. Post Office and Custom House, St. Paul, Minnesota, 55101.

Engineer Day Festivities Enjoyed By All

The annual Engineer Day festivities were celebrated by the St. Paul District Office with an address by Col. William Badger and a family picnic on June 13.

In the address, Col. Badger discussed the status of District activities and operations, and the role of the District in the future. The address was inspiring and full of encouragement to all of the employees, and at the same time stressed the need to continue working at a high standard of professionalism.

Later during the same day at Lake Phalen Park in St. Paul, the Engineer Day Picnic for employees and their families and friends was held. There was plenty of food and refreshments for everyone, and many games were played.

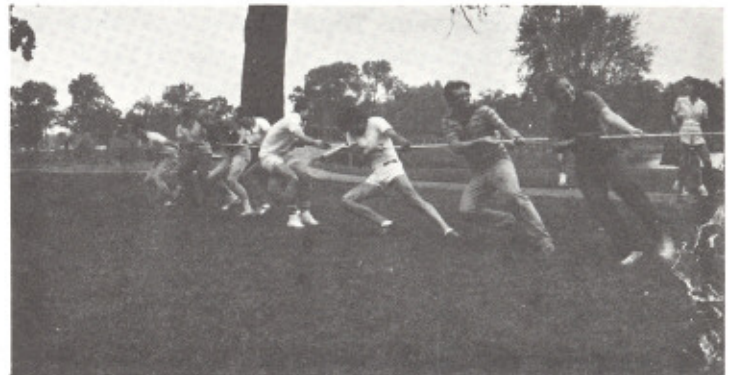

Winners of the horseshoe competition at the picnic were: Tim Fell and Frank Mazurkiewicz.

Winners of the tug-of-war competition were: Craig Collison, Jerry Cohen, John Kliethermes, Mike Rohrwasser, Gerry Enger, Bill Vennemann, Debbie Peterson, and Peter Casillas.

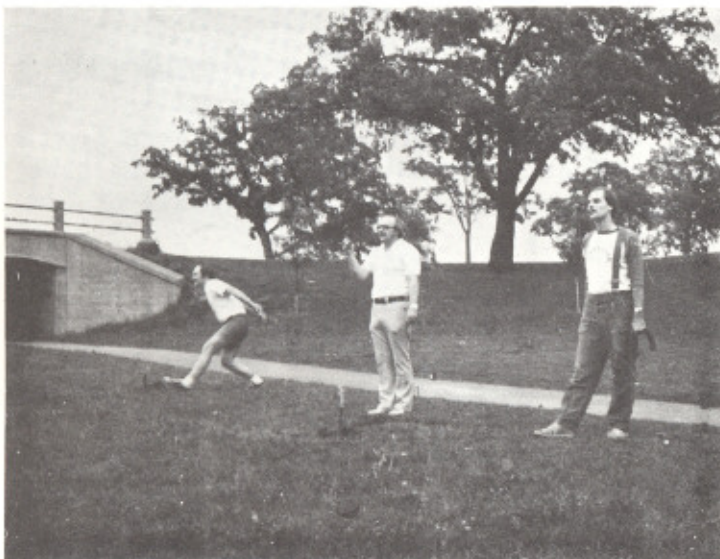

Winners of the volleyball competition were: Sheldon Edd, Wendy Lindback, LaDonna Holmberg, Doug Holmberg, Arnie Thompson, Paul Madison, and Cadet Michael Jaye.

Just clowning around at the picnic.

A tug-of-war team in action.

Deep in concentration are horseshoe throwing competitors.

Corps Employees Are Honored

In celebration of Engineer Day 1980, many Corps employees were honored and awarded for various service achievements. Some of the employees present at the Engineer Day Picnic at Phalen Park in St. Paul on June 13, were presented their awards.

Distributed were length-of-service awards and sick leave accumulation awards.

Also awarded were the special achievement awards. Sharon Brown received the Chief of Engineers Award for Outstanding Achievement; Charles Spitzack, the Chief of Engineers Award for Engineering Excellence; Ronald Tuura, the North Central Division Award for Handicapped Employee of 1980; Joanne Catherman, Daniel Krumholz, and Burrell Reintz, the 1980 Civil Servants of the Year Awards.

Just Between Us

Get-well wishes go to the following persons hospitalized: Glenn Kress, Lake Traverse; Diana Tschida, DC-FE; Lloyd Tibor, L/D #5; Lois Pream, ED-PB; and Bill Gray, CO-MA. A get-well wish also goes to Don Peterson, ED-D on his illness.

Employee Helps Develop Community Project

by I.C. Diamond, L/D #6

After several long years of hard work, Lester "Pete" Leavitt, Lockmaster, L/D #6, was rewarded by seeing his community project completed.

It began about four years ago when the Village of Trempealeau, WI, was willed \$40,000 by Myrtle Packard, former resident of the village. The terms of Packard's will stated that the money had to be used for recreational purposes for the children of the village, otherwise the money would be given to the Community Memorial Hospital in Winona, MN.

The village picked a committee to determine what the money should be used for. The committee decided to conduct a feasibility study for building a swimming pool. Leavitt was chosen as chairperson of the committee.

Through Leavitt's efforts with the Lions Club and many other local civic organizations, the State government, and the matching funds group of Land and Water Conservation Fund Act (LAWCON), the committee was able to obtain sufficient funds to finance the project.

After devoting many long hours of work to the community project and after four years since its inception, Leavitt finally saw the dedication of the pool on May 25, 1980.

Contest Winners Awarded At Picnic

The winners of the St. Paul District 1980 Amateur Photography Contest were announced and awarded at the Engineer Day Picnic on June 13, at Phalen Park, St. Paul. Each of the nine winning entries received a certificate.

Of the 32 entries, none were black and white; all were color photographs. The following are the winners:

CATEGORY: General

1st Place Winner:

Robert C. Stackowiak, ED-HF.

Category: People

1st Place Winner:

Henrik C. Strandkov, CO-RF.

2nd Place Winner: Ken Harrell, CO-RF.

CATEGORY: Scenic

1st Place Winner: Thomas A. Oksness, CO-PO.

2nd Place Winner: Glenn M. Engstrom, ED-D.

3rd Place Winner:

Margaret Ruth Tavis, Sandy Lake Dam.

CATEGORY: Experimental

1st Place Winner: Harold E. Taggatz, CO-C.

2nd Place Winner:

Margaret Ruth Tavis, Sandy Lake Dam.

3rd Place Winner: Dale M. Brintnall, CO-RF.

Thanks For the Memories

Chuck Bridger recently retired from the Construction-Operation Division. He sent this letter of appreciation to all of his co-workers:

"I wish to take this opportunity to thank you one and all for the very nice party that was given in my honor for my retirement. It was nice of Sharon (Pffifer) and Lori (Kroyer) to take the time and energy to do this for me. Thank you both.

I want to thank Col. Badger for taking himself away from his busy schedule to stay and talk to me and my fellow workers.

I am at a loss as to who it was that gave me the nice poem, 'Ode to Chuck Bridger Bridger.' All I can say is thank you very much to whomever you are.

Again, thank you all from the bottom of my heart; my best to you all."

IN REMEMBRANCE

A touch of sadness is felt at the passing of former Corps employee, William G. Straub, in early May 1980. He was with L/D #1 at the time of his retirement.

A Look At Midwest Nat'l Parks

For decades, the Great Lakes Basin lagged behind other parts of the country in its share of national parks. The National Park Service administered only a few.

But the region is catching up. Since 1970, the basin has become home to the nation's first and only four national lake-shores and a major national recreation area.

Now the basin has 12 park units. The following describes a few.

Isle Royale National Park: 87 North Ripley St., Houghton, MI 49931; phone (906) 482-3310. Has 571,796 acres, and 131,880 acres of wilderness; wilderness areas are portions of existing federal lands not all administered by the park service that are preserved without permanent improvements, human habitation, or use of motorized vehicles. Is the largest island in Lake Superior. Has timber wolves and moose herds, shipwrecks, and Pre-Columbian copper mines. Is accessible only by boat or floatplane. Acreage includes surrounding waters.

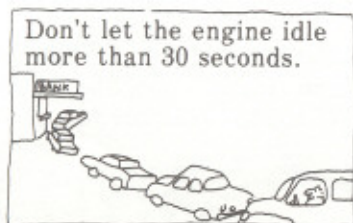

Apostle Islands National Lakeshore: Old Courthouse Bldg., P.O. Box 729, Bayfield, MI 54814; phone (715) 779-3397. Has 42,011 acres. Is 20 picturesque islands. Has sea caves, rare plants, archeological sites, brownstone quarries. Birds concentrate there, especially during migrations. Has five historic lighthouses.

Pictured Rocks National Lakeshore: P.O. Box 40, Munising, MI 49862; phone (906) 387-2607. Has 70,807 acres. Has colored sandstone cliffs from 50 to 200 feet high. Also has beaches, rock formations, waterfalls, dunes, inland lakes, hardwood forests.

Grand Portage National Monument: P.O. Box 666, Grand Marais, MN 55604; phone (218) 387-2788. Has 710 acres. Is an 8½ mile portage trail between Lake Superior and the Pigeon River. Is the reconstructed site of rendezvous for 18th and early 19th-century trappers, traders, and missionaries.

History Repeats Itself For Corps Employee

by Jim Adams, ED-D

Whoever says history cannot repeat itself should read about the recent experience my wife and I had.

Twenty-seven years ago almost to the date, shortly after I (a SFC in the Army) and my new bride, Tomiko "Betty" were joined in marriage, we were interviewed by news reporters from two local newspapers and a radio station in Sendai, Japan.

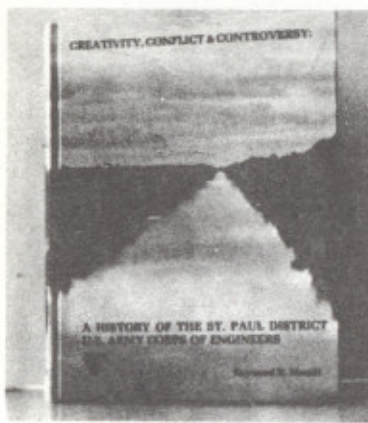

In early April 1980, Clarence Timo, EP-A, approached me with a story about a war souvenir he obtained in 1945 on the island of Okinawa. He heard we were planning a trip to Japan later that same month. The souvenir was a Japanese Army photo album with a few pictures in it. Timo asked if we would be willing to return the album to Japan and perhaps to its rightful owner. The idea intrigued my wife and I; we agreed to help.

We arrived in northern Japan in mid-April, and discussed the photo album situation with our nephew, Yoshio and our niece, Mitsui. Mitsui contacted the National Missing Persons Bureau, and Yoshio contacted a national television network and numerous newspapers.

In early May, we were contacted by a television station and the very same two newspapers which interviewed my wife and I 27 years before. We talked to them about the photo album and our desire to seek out the rightful owners. The newspaper reporters took the album and our address, including Timo's. They informed us they would run copies of the photos in their newspapers and over the wire service to other newspapers. Likewise, the television news reporters said they would air the photos on national television.

The newsreporters felt very confident they would locate the individual(s), and they commended Timo on his gesture. The reporters will contact us with the results of the search efforts.

So, history can repeat itself as it did for Betty and I concerning the contact with the two newspapers. I would like to say it was the same reporters as 27 years ago, but that would be stretching things too far. It is enough to say that the search efforts are being carried out and hopefully, it will prove to be successful.

Book Review

by Michael C. Robinson

CREATIVITY, CONFLICT AND CONTROVERSY: A HISTORY OF THE ST. PAUL DISTRICT, U.S. ARMY CORPS OF ENGINEERS. By Raymond H. Merritt. (Washington, DC: Government Printing Office, 1980. 459 pp. Illustrations, maps, tables, graphs, notes, appendices, bibliographical note, and index. Cloth, \$15. GPO Stock Number 008-022-00138-7.)

The Army Corps of Engineers is the only federal public works agency that is making a systematic effort to document its history. The Corps' districts and divisions have individually sponsored retrospective analyses of their evolution. The depth, approach, and general quality of the volumes has varied widely.

Merritt's book will hopefully serve as a prototype for other contributions to the series. Its principal strength is the breadth of focus. The volume transcends the narrow institutional boundaries that frequently circumscribe "official" agency histories. The book describes in a wholistic and highly sophisticated manner the role of the Corps in the urban and technological growth of the metropolitan network centered in Minneapolis and St. Paul, Minnesota.

Too often the agency's role in water resource development and management is put in consensus terms, such as the Corps merely doing what the people and Congress want it to do. This book, however, illustrates that creating water policies and programs is a rough and tumble business.

Merritt includes a host of information on efforts by individuals, corporations, governmental entities, and special interest groups to shape water resource activities in accordance with their points of view.

Merritt finds throughout the district's history a strong tradition of broad democratic participation in the decision-making process; the book, therefore, is not a paean to the virtues of the Corps program. In addition to describing the agency's contribution to the area's quality of life, it illustrates how the public has given the Corps opportunities for service that transcend the principal mandated concerns of flood control and navigation.

The St. Paul District claims a number of firsts that are thoroughly described in the volume: a system of water reservoirs in northern Minnesota; the first Corps hydroelectric dam; the navigation project at the Falls of St. Anthony; and the structures that comprise the 26 locks and dams on the Upper Mississippi.

Furthermore, the book's footnotes reflect a prodigious research effort. Merritt plowed through volumes of government reports and 100 years of district correspondence to prepare this exemplary history. Many unique Corps activities are outlined that should be an inspiration to others working in the field.

Merritt and the Corps are to be congratulated for devoting a considerable portion of the project's resources to the book's design. Every dimension from the layout to the paper quality is first class. The photos, maps, and other illustrative materials are carefully integrated with the text, and a reading through of the photo captions in effect constitutes a book within a book.

Off the Press

The following publication is available free from the U.S. Environmental Protection Agency (EPA). Entitled, "Profile of Environmental Quality, Region V - the Midwest," the publication takes a comprehensive look at air and water quality, hazardous and solid waste problems, toxic substances, noise, radiation, pesticides, and the Great Lakes. The report shows progress EPA has made in improving and preserving the environment and identifies environmental problems yet to be solved. It is illustrated with full-color photographs, maps, and charts. It includes an economic overview of the Midwest, and a list of references.

Contact the Public Information Office, U.S. EPA Region V, 230 S. Dearborn St., Chicago, Illinois; (312) 353-2072.

Free Consumer Handbook Offered

To help people solve their consumer problems, the Federal Government is offering a free booklet, the "Consumer's Resource Handbook."

It tells how to resolve consumer complaints, find helpful information to prevent future problems, and locate the right government office or private organization for assistance.

The first section of the hand book features a complaint handling primer. It outlines procedures to follow when you have consumer gripes and describes a number of organizations and sources of assistance. There is even a model complaint letter which can be followed for your own complaints.

The second section is a guide to government services and information. This section is arranged topically, ranging from advertising to weights and measures. Under each heading, the handbook provides information on the agency or agencies having regulatory authority or otherwise dealing with the subject area.

The third section is a directory of state and local consumer offices.

To get a free copy of the handbook, send a postcard to the Consumer Information Center, Dept. 635 H, Pueblo, Colorado 81009. Be sure to include your address and state that you are requesting the "Consumer's Resource Handbook."

Extracted from "Information Bulletin," May 1980; Sacramento District, Calif.

Free Parking Offered to Bicyclists

Commuters riding bicycles into downtown St. Paul, MN. now have a safe place to stash them.

An indoor lot with room for 100 bicycles, located in a vacant store at 350 Wabasha St., opened its doores in mid-June. Parking is free. The store parking lot has an attendant to check bicycles in and out. Hours are limited, 7:30 a.m. to 5:30 p.m. The city will operate the lot until Sept. 1.

The city also has free 24-hour bike lockers against the wall of the Courthouse on Kellogg Blvd., downtown. The parking is free; a \$5 deposit on the lock and key is refunded when they are returned.

Extracted from, "St. Paul Pioneer Press," June 17, 1980.

Handling Criticism

One of the unpleasant parts of a supervisor's job is reprimanding workers when they fail to do good work or when they display poor attitudes. It is, however, an important part of the supervisor's job. Constructive criticism, offered in a timely fashion, can solve "little problems" before they become ingrained behavior patterns.

As a supervisor, it is part of your job to see that your employees do good work. Most of them will work up to par without too much effort on your part. They know what is expected of them and will do it.

Criticism, like reward, should be doled out at the time of the performance which justifies the action. It should be given unemotionally and should include recommendations on what needs to be done to correct the situation.

Unlike praise, criticism should be given in private. It should be in keeping with the degree of the offense and should be neither delayed nor prolonged.

Supervisors must be careful that the criticism is directed at the quality of performance and not at individual characteristics.

Great care must be taken not to exaggerate the degree of the problem. Don't let your momentary anger over a situation cause you to make an exaggerated assessment of the importance of it. Most people are quite willing to accept criticism as long as it is justified and straightforward.

When you criticize, be direct, be objective, be specific and be positive. Successful supervisors use criticism sparingly but effectively. It creates a work situation which keeps workers and supervisors happy and on top of their jobs.

Extracted from "Firstline," Vol. 4, No. 3; April-May 1980; U.S. Office of Personnel Management.

Duluth Sanitary District Makes Big Advances

The Western Lake Superior District, serving Duluth, Minnesota and surrounding suburbs, was the runner up this year in the Outstanding Civil Engineering Achievement award of 1980, receiving an Award of Merit.

Among the most notable things about the district and its new, central advanced wastewater treatment facilities: the first sanitary district in the U.S. to have responsibility for the disposal of both wastewater and municipal refuse; a dramatic improvement in water quality of the St. Louis River and Bay; the co-incineration in a fluidized-bed reactor of all the region's sewage sludge and municipal refuse, the first time a fluidized bed has been used for such; and recovery of heat and scrap iron from the refuse.

Why did this happen in Duluth first? One possible reason, suggests sanitary district planner John Klaers, is that the district was starting from scratch. It was scrapping nine aging primary plants and replacing them with a single, central wastewater treatment plant. This meant much more sludge to dispose of than in the past. It was a new problem: how to get rid of these new, massive volumes of sludge? Incineration in a multiple-hearth furnace was the obvious choice. The sludge would be dewatered and the resulting cake charged into the incinerator. Fuel oil would be used to help burn it. But then came the Arab oil embargo. Availability and cost became an important factor in the usage of fuel oil. Then came a solution - usage of municipal refuse.

With the existing landfills for the regional refuse causing environmental problems, incinerating the refuse became favorable because of the advantage of curbing the water pollution generated by the landfills.

Most important, the Minnesota legislature was able and willing to give the sanitary district the needed authority.

Finally, the federal Environmental Protection Agency came through with construction grant funds - even for the fluidized-bed incinerator. These funds are normally used exclusively for water-pollution-control projects. But the district was able to convince EPA that burning refuse with sewage sludge was, indeed, related to water pollution control.

Quick Assistance Offered At Accident

by Carl Stephan, ED-PB

Take Time

by Doris Hurd

Take time to WORK...
it is the Price of Success.
Take time to THINK...
it is the Source of Power.
Take time to PLAY...
it is the Secret of Perpetual Youth.
Take time to READ...
it is the Fountain of Wisdom.
Take time to WORSHIP...
it is the Highway to Reverence.
Take time to be FRIENDLY...
it is the Road to Happiness.
Take time to LAUGH...
it is the Music of the Soul.
Take time to DREAM...
it is Hitching your Wagon to a Star.
Take time to LIVE!

From "Soundings," Vol. 3, No. 6, May 1980;
Detroit District, Michigan.

My wife Joanne, my mother-in-law, and I were first on the scene of a serious auto accident on June 11.

Three youths in a Trans-Am sports car passed us south of Spooner, Wisconsin on Highway 63, going at a high rate of speed and then disappeared over a hill.

Driving over the hill, we sighted a cloud of dust on the right shoulder of the road. Seconds later, we saw the Trans-Am lying smashed against a tree.

We immediately hailed several passing cars to send for an ambulance. The three youths were pinned inside the Trans-Am and had sustained serious injuries.

We were able to calm the victims until police and an ambulance arrived on the scene. Joanne, a Registered Nurse, assisted the emergency personnel in helping the victims at the site of the accident.

We don't know how the victims fared after the accident.

An unexpected result of the incident occurred a few days later to me. I developed a rash on my legs and feet. The accident site had been in a patch of poison ivy!

THE CAP WAS TOO BIG...but the duckling didn't seem to mind. The duckling was first noticed on the lockwall of Lock & Dam #3 when it waddled up to senior lockman, Wayne C. Beard, in late May. The duckling became useful during cleanup operations; when the lockmen cleaned their office windows free of bugs, guess who enjoyed picking them up at the bottom of the sills. After its brief stay, the duckling was released back into nature.

(Photo courtesy of Richard L. Thomas, L/D #3)

Marathon Runners Endure Grandma's

by Mark Slaughter, ED-HF

Five employees of the St. Paul District participated in the running of Grandma's Marathon on June 21.

The annual footrace is run from Two Harbors, MN to Grandma's Saloon and Deli in Duluth; a total of 26 miles, 385 yards. This is the distance a Greek runner, Phidippides, ran from Marathon to Athens in 490 B.C., to tell of the victory over the Persians on the battle field.

Needless to say, he dropped dead; but I'm happy to report that the following five people did not. Steve Nelson, age 29, and Jan Janos, age 31, both of Upper St. Anthony Falls Lock and Dam, had times of 3:34:00 and 2:59:09, respectively. Tom Larson, age 37, of the Office of Counsel, Tom McAloon, age 47, and Mark Slaughter, age 30, both of the Hydraulics Section, had times of 3:16:59, 3:10:30, and 3:29:56.

Ages are mentioned to induce others into running regardless of their age. McAloon's time was almost 30 minutes slower than his personal best of 2:41:00, which ranks him with some of the best over-40-years old runners in the Twin Cities. Pretty good for an old man with gray hair and skinny legs.

Scale of Fish Entries On the Increase

by Wilbur Walleye

As of June 19, many good catches of fish have been entered into the St. Paul District Annual Fishing Contest.

Several "bonus" fish have been submitted including one 36½" northern, two walleyes, one crappie, four rock bass (two from Dave Haumersen), one each of rainbow, brown and brook trout, one white bass, and two bullheads (both from Wayne Koerner).

Get your entries in within one month after catching the fish. Contact one of the office branch representatives for information on contest rules.

OLD TIMER'S CORNER
 FIFTH ANNUAL REUNION OF CORPS OF ENGINEERS EMPLOYEES,
 PAST AND PRESENT, ON SEPTEMBER 3, 1980

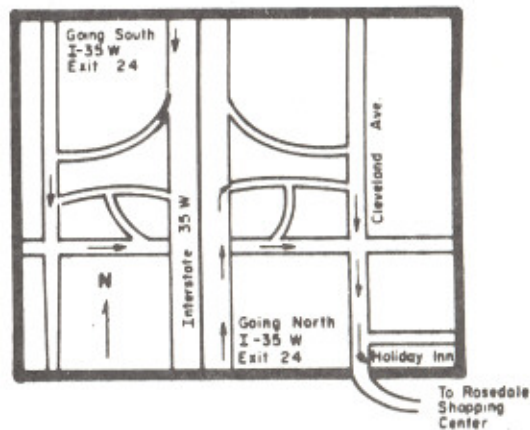

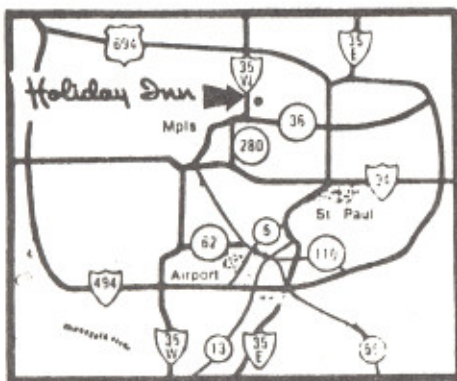

The meeting place is Holiday Inn - Roseville, 2540 No. Cleveland Ave., just north of St. Paul (see maps) in the Roseville Room between noon and 5 p.m. This is the same place the reunion was held in previous years.

Lunch will be served at 1 p.m., with a choice of Yankee Pot Roast or Celestial Chicken Breast both at the price of \$7.00 per serving including gratuity and sales tax.

All past and present employees of the Corps of any office or field unit with their wives or husbands, and wives or husbands of former employees, are welcome.

For those who cannot make it to the luncheon, you are welcome to come later to meet and greet old friends.

Maps showing how to get there by car:

Reservation Form: Fill out, clip and return the following form for registration of your reservation. All reservations must be received by August 20, 1980.
