

# Create IT Business Value while advancing Sustainability Initiatives

Dell Technology Rotation provides a simple way to participate in the circular economy, save costs and reduce your impact on the planet. \*\*

The circular economy is aimed at eliminating waste and the continual use of resources

When choosing Dell Technology Rotation to manage your IT infrastructure, you are contributing to the circular economy because we:

**Refurbish**  
hardware at the end of the term

**Remarket**  
hardware after data sanitization

**Recycle**  
hardware in a secure and environmentally conscious manner

Up to 95% of systems are refurbished, gaining a second life by being resold\*

The remaining are recycled in adherence with all applicable international, regional, national and local laws and conventions\*

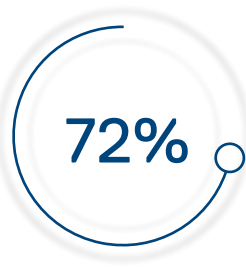

Our Electronics Disposition Partners have achieved a minimum certification level of ISO 9001, ISO 14001<sup>S</sup> and ISO 45001<sup>S</sup> and are audited continually to ensure compliance.

72% of companies mention sustainability development goals (SDGs) in their annual corporate report†

50% of companies have identified priority SDGs†

54% of those that prioritized the goals, mention them in their business strategy†

†Source: PwC, SDG Reporting Challenge 2018 Base: All companies (729)

Dell Technologies recognizes that SDGs are an important part of your business objectives today.

Dell Technology Rotation can help you achieve those objectives at the end of the IT lifecycle or whenever business requires IT changes.

The advantages of Dell Technology Rotation extend beyond sustainability objectives and can help your organization overcome operational challenges and execute your IT strategy.

The business benefits of your IT devices comes from them being utilized, not owned. Dell Technology Rotation delivers business value, simplicity, flexibility and transparency throughout the agreement period by:

**Increasing Operational Efficiency**

Simplify acquisition, operations and transitions

Stay current with the latest technology innovations

Optimize IT spend and boost workforce productivity‡

**Improving Business Flexibility**

Spread payments over time to retain cash

Free up capital from long-term IT infrastructure investments

Improve agility and readiness for new opportunities

**Lowering Total Cost of Utilization‡**

Save 34% on Servers

Save 27% on Client devices

Save 60% on Storage
